1. Site Name & Purpose

Site Name

Camping for Dummies

Elevator Pitch

Ever wanted to go camping but secretly feared you'd end up as bear food, freezing to death in a collapsed tent, or divorced over a single soggy weekend?

Camping for Dummies is your brutally honest website that saves beginners from their own terrible decisions. We cover gear, setup, food, and survival with dead-simple guides, checklists, and zero sugarcoating.

No experience? Perfect. We'll help you survive the woods — and maybe even enjoy it a little — instead of becoming a cautionary tale.

Target Audience

- People who have never been camping before
- Young adults (18–35) curious about outdoor adventure
- Parents planning a first camping trip with their kids
- Anyone who wants to enjoy nature without feeling overwhelmed

Goal of the Site

To educate and encourage beginner campers by providing clear, friendly, and practical information in an organized, easy-to-navigate format. A visitor should be able to come to this site with zero camping experience and leave feeling ready to plan their first trip.

2. Site Structure

The site consists of three pages: a Home page and two child pages. Every page shares the same navigation bar, logo, and footer so visitors always know where they are and can jump to any section in one click.

Page	Purpose	Key Content
Home (index.html)	Welcome visitors, establish the brand, and direct traffic to the two child pages.	Hero image, welcome message, three featured-section cards (Tips / Gear / Safety), quote banner, photo gallery strip.
Camping Tips (tips.html)	Teach beginner campers the essential skills and knowledge they need before heading out.	Planning your trip, campsite setup, fire safety, Leave No Trace principles, two or more images.
Gear Guide (gear.html)	Help beginners choose the right equipment without overspending or buying the wrong thing.	Tent types, sleeping bags, clothing layers, cooking gear, first aid basics, two or more images.

Navigation

Every page includes a top navigation bar with links to all three pages. The current page's link will be visually highlighted (bold or underlined) so users always know where they are. The logo also links back to the home page.

3. Color Scheme

The palette is inspired by the outdoors — sunshine, forest, and the warmth of a campfire. The yellow is energetic and immediately recognizable (used in the logo), while black and white keep the text clean and readable. Forest green adds a natural, earthy accent.

Color Name	Hex Code	Swatch	Primary Use
Sunshine Yellow	#F5C800	Sunshine Yellow	Navigation bar, CTA buttons, accent highlights
Midnight Black	#1A1A1A	Midnight Black	Footer, quote banners, body text headings
Campfire White	#FFFFFF	Campfire White	Page background, card backgrounds, body text areas
Forest Green	#2D6A4F	Forest Green	Accent for links, section markers, hover states

Color Usage Rules

- Yellow (#F5C800) — Navigation background, call-to-action buttons, section highlights. Never used for large blocks of body text.
 - Black (#1A1A1A) — Footer backgrounds, quote banners, primary headings.
 - White (#FFFFFF) — Page and card backgrounds. Keeps content readable.
 - Forest Green (#2D6A4F) — Hyperlinks, hover states, section dividers, small accent elements.
-

4. Typography

Font	Role	Sizes Used	Why This Font
Oswald (Google Fonts)	Headings (H1, H2, H3)	2.5rem / 2rem / 1.5rem	Tall, bold, and adventurous — matches the outdoor brand personality.
Lato (Google Fonts)	Body text, paragraphs, lists	1rem / 0.9rem	Highly readable, friendly, pairs well with Oswald.
Courier New (system)	Code snippets / gear codes	0.85rem	Monospace for any technical callouts.

Both Oswald and Lato are available free from Google Fonts (fonts.googleapis.com) and are linked in the HTML <head> of each page. No font files need to be downloaded or hosted locally.

5. Content Plan

All text and images are original or properly licensed. Each page meets the course requirement of significant textual content and at least two images per page (not counting the logo).

Home Page Content

- Hero headline: "Get Outside. Start Simple. Camp Smart."
- Welcome paragraph (~100 words): introduces Austin Glenn and the purpose of the site.
- Three feature cards with short descriptions linking to Tips and Gear Guide pages.
- Pull quote banner: a short motivational quote about camping.
- Four-image gallery strip showing campsite, fire, stars, and a trail.
- Images: (1) wide campsite panorama, (2) person setting up tent, (3) campfire at night, (4) hiking trail.

Camping Tips Page Content

- Section 1 — Planning Your Trip: choosing a campsite, making a packing list, checking weather. (~150 words)
- Section 2 — Campsite Setup: tent placement, sleeping pad tips, organizing your space. (~120 words)
- Section 3 — Fire Safety: building a fire safely, putting it out, fire ban rules. (~100 words)
- Section 4 — Leave No Trace: packing out trash, respecting wildlife, staying on trails. (~80 words)
- Images: (1) illustrated packing checklist graphic, (2) properly assembled campfire ring photo.

Gear Guide Page Content

- Section 1 — Tents: differences between 2-person, 4-person, and ultralight tents. Budget picks. (~130 words)
 - Section 2 — Sleeping Bags & Pads: temperature ratings explained, foam vs. inflatable pads. (~100 words)
 - Section 3 — Clothing & Layering: base layer, mid layer, shell. No cotton rule. (~90 words)
 - Section 4 — Camp Kitchen: backpacking stove, utensils, water filter basics. (~80 words)
 - Section 5 — First Aid & Safety: blister care, insect repellent, emergency whistle. (~70 words)
 - Images: (1) flat-lay of camping gear spread on ground, (2) close-up of a well-organized camp kitchen setup.
-

6. Wireframes

Wireframes show the layout structure of each page type. Shaded rectangles with X marks represent image placeholders. Gray bars represent text content. Navigation, headers, and footers are consistent across all pages.

Wireframe 1 — Home Page (index.html)

Wireframe 2 — Child Pages (tips.html / gear.html)

Both child pages use the same two-column layout: a main content area on the left and a sidebar on the right. Only the heading and body content differ between the two pages.

7. Technical Specifications

File Structure

File / Folder	Description
index.html	Home page
tips.html	Camping Tips child page
gear.html	Gear Guide child page
styles/main.css	Single shared stylesheet for all pages
images/	Folder containing all photos and the logo
images/logo.png	Camping for Dummies logo (Austin Glenn)

Hosting

The site will be hosted on GitHub Pages (free, public URL). The repository will be named camping-for-dummies and the live URL will follow the pattern: username.github.io/camping-for-dummies

Image Sources & Credits

- All photos sourced from Unsplash.com (free, no attribution required) or taken personally by Austin Glenn.
- Logo image: "Camping for Dummies by Austin Glenn" — created for this project.
- Any illustrations created using Canva (free tier).

Responsive Design

- The site will use CSS Flexbox and media queries to adjust the layout for mobile screens.
- On mobile: the three-column card row on the home page will stack to a single column.
- On mobile: the two-column child page layout will collapse so the sidebar moves below the main content.
- Navigation will remain horizontal but font sizes will adjust for readability.
